FINANCIAL AND COMMERCIAL.

The money market was rather active last week artly in consequence of the large and very singu un dation of money in the Sub-Treasury, artly from a concerted attempt on the part of money lenders to obtain higher rates of in-This attempt would have been attended very little success but for the fact that opees in merchandise, which is extremely dull, are wa speed deal of money just now to carry low-priced securities on which the at of fact, the supply of money is and all along in excess of the demand. Yesing every one was anxious to make his o'clock money was worth seven two and three P. M. the demand fell off , and money was freely offered at six, ment, and the large increase of money and paper securities, such as debt certifi market can last for more than a day or two especially as periods of activity on the periods of diffness, during which but few of ers are borrowers. Debt certificates cone, and 11/4 a 3/4 premium for the old. Mercantile paper is scarce; prime names sell at 51/4 a 61/4 per cent, good mercantile paper at 6 a

there was little spirit in the speculation for the rise. It sold as high as 148% and as low as 144%. last evening at about 145. Exchange con tinues dull. Trade is stagnant, and there is little or no inquiry for bills among importers, while the pecie from San Francisco keep the market well applied with exchange. At the close yesterday 167 a 1/4 was about a fair quotation for bankers Operations-invariably for the rise-continue to be made in gold and exchange, for acout of the parties whose headquarters are at are generally supposed to be with the rebels; but disappointment and loss have latterly invariably sttended their ventures. No bad news, however distressing to loyal men, seems capable of put-ting up the price of gold and keeping it With the exception of a few foreign merwho do not understand the position this country, and cannot gauge its resources one now cares to hoard specie. Neither it, and but few chartered institutions care about lending at all to speculators in the depreciation of the national currency. The steady progress its face, and that the experience of foreign natious, with no resources, no immigration and no supply of bullion, is no guide whatever for the course of events in this country. If Vicksburg and Port Hudson fall it will be safe to look for s

The following table shows the course of the stock

ant stock market, which gradually tapered of and became dull and lower toward the close of the week. Yesterday was a very dull day, though at which is the best criterion of the market, sold as high as 98%, and as low as 95, last week, closing about 90%. Operators appear generally to be before Vicksburg, and partly because of them have realized large proand are thinking of enjoying them. operators have withdrawn from the street. Their time new apeculators will succeed them, with boldness and capacity not less than theirs ; but until they arise it is natural that the volume of business nid be less than it was. The general principles which govern the market have undergone ne change. Whether Vicksburg falls or no, so long as the war is prosecuted on a paper basis, and government continues to expend \$2,000,000 a day, the inevitable tendency must be toward increased traffic on the railways, and consequently increased dividends on railway stocks and increased prices for railway shares. Wall street has made its mind up to a decline in stocks if Vicksburg falls, and the presumption is that what every one expects will be made to come true. But the fall of Vicksburg would not diminish the business which has been created by the issue of paper money, and the only effect of a decline in prices would be that the old street operators, who have been out of stocks for some time, would have an opportunity of buying in again at low figures. The earnings of the roads for May show an increase of from 25 to 50 per cent. The Eric earnings, which will not be published before the 15th, will probably show an increase but slightly less than that of April, and will render it certain that the company will have considerably over a million dollars on hand applicable to dividends, after pay-Ing interest, expenses and 3½ per cent on the pre-ferred stock, on the 1st July. There is less specu-lation than there was in the stocks which are at a promium. Experience teaches that in times like these there is more morey to be made in buying cheap stocks than high priced ones. The largest fortunes which have been realized within the past eighteen months have been made in the stocks and bonds of reorganized railroads, which have been made good by the general increase of railway traffic. It may safely be taken for granted that the stocks of all roads which last year were able to pay interest on their bends are going this year to earn a dividend, and if not too high now are pretty sure to advance in market value. The stockholders' meeting of the Cleveland and

Pittaburg, which will be held on the 1st proxime. will be one of the most important railroad meetings ever held in this country. The question to be submitted to the stockholders is whether or no they will avail themselves of the railroad act of the State of Ohio and grant to their bendholders the privilege of converting their bonds into stock. As the bonds are selling at 105 a 110, while the stock is only 90, the privilege would appear on the first blush to be an empty pun. But it is not so viewed by those who know the property best. Holders of the first (i. e., second) mortgage bonds are earnest applicants for the right of exchanging those bonds, worth 110, for stock now 90, and the opinion prevails among the leading men in the concern that if the were made convertible the company would have little or no funded debt on the 1st of January next.

This opinion, of co rse, rests upon the belief the when the stockholders meet in July they will be

shown a statement of the affairs of the compan which will satisfy them that the stock is more able than the 7 per cont mortgage bonds. On the question which the shareholders will have to deone hand, it may be said that it is true of railroads, as of individuals, that there is no investmen so profitable as paying off one's debts, and that by liquidating the bonded debt of the company the stockholders fortify themselves against a recurrence of hard times and the poss ility of defaults on coupons. But, on the other hand, if bondholders want to convert, the presumption is that they would gain nothing by doing ers, who have dispensed with income for so many years while their bondholders received their interest regularly, should now, on the return of pros the profits of the bondholders. In other words, it is expected that the July statement will show that probably be fairly regarded as a ten per cent stock hereafter. Would it not be fairer, instead of giving the bondholders the right of taking their share of this ten per cent, to pay them their usual seven per cent and devote the balance to a sinking fund for the extinction of the bonds at maturity?

We are authorized by the direction of the Cen tral American Transit Company to state that the rumors of new difficulties on the lathmus which have found currency in a city journal are wholly unfounded. The company's latest advices from the State of Nicaragua are to the effect that the authorities of that State are prepared to carry ou the provisions of the grant in good faith and to afford every facility to the transit of passengers.

CITY COMMERCIAL REPORT. Asmes -There were 25 bbls. pots sold at Sc. Pear

a 480.

BROWN.—Pork was plenty and beavy at \$11.75 a
BROWN.—Pork was plenty and \$10.50 a \$11.75 a
me, with sales of 2,200 bbls. Beef sold to the ex540 bbls., at \$9.50 a \$11.75 for plain, and \$12 a
for extra mess. 250 pkgs. cut meats were sold at
ex500 broze becon changed hause at 6c. a 7½c,
for packages lard at 9½c. a 10½c. Butter and
were quiet at former quotations.

—Sales were made of 270 bags East India at 8½c.

Sign.—For goat there has been a moderate inquiry Skys.—For goat there has been a moderate inquiry from out of town manufacturers, and a number of sales of Mexican, ne small parcels, have been effected at prices ranging from 60c. a 70c. From New York buyers the denand is very limited, they being of opinion that prices for the raw material will decline still more. The stock is only moderate and prospective recepts light. We not essess of about 30,000 Matamores and Tampico at 60c. as 10c. cash. A portion of the recent arrival of Geracca have been sold on private terms, but the majority of manufacturers refuse to buy that description of stock unless at very low rates, the quistity of most received during the last two years having been very inferior. For deer the inquiry continues good, and most of the recent arrivals have been taken out of the market at full prices. We note sales of about 3,000 lbs. Central American, 2,000 lbs. Sisal, and 1,500 lbs. Honduras on private terms.

Sucans were in active request again to day, and 1,300 hids, and 2,300 boxes changed hands at 115,c. a 116 for New Orleans, 10 %c. a 12c. for Porto Rico, and 23/c. a 115/c.
